### 2.3 Detail Drawings

Fixed light up to 30 kg glass weight

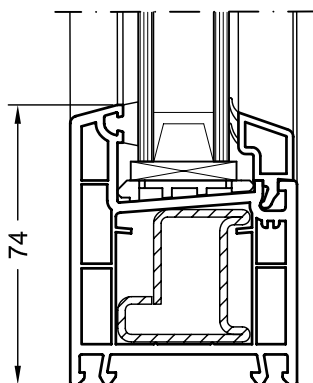

Frame 64 Euro 60,  
Art. 554002

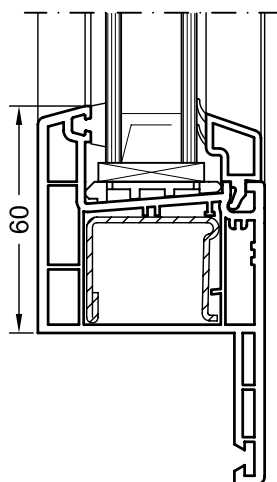

Frame 74 BD,  
Art. 554031

Fixed light above 30 kg glass weight

Frame 74 BD,  
Art. 554031  
(with reinforcement  
Art. 239982)

Frame 60 with exterior fin  
Euro 60,  
Art. 544411

To support the weight of a fixed light over 30 kg, independent of the fixing possibilities into the masonry, the lower frames cross-piece must be reinforced.  
The reinforcement must be positioned so that the weight of the fixed light will be transferred to the building.

Furthermore, the instructions regarding ventilation slots must be observed (see the Manufacturing Recommendations).

The glazing must be carried out using the glazing tables found in the Glazing Recommendations.

Maximum profile length for fixed lights:  
Colour white: 3,0 m  
Coloured/foiled: 2,5 m
